4. In both thematic and athematic 3. pers. pl. forms, we have *a*.
- 4a. In parasmāipada 3. pers. pl. forms like *ru-n-dh-a-n-ti*, we have *an* due to borrowing of *a* from the thematic classes.
- 4b. In contrast, ātmanēpada forms like *ru-n-dh-a-tē* do without this borrowing and *a* goes back to syllabic *n*.
5. We explain the imperfect 3. pers. sg. by

a-ru-ṇa-dh-t

- *a-ru-ṇa-dh* (simplification of consonant cluster)
- *a-ru-ṇa-t* (voiced or aspirated consonant not allowed in final position)

This also works for the 2. pers. However, the 2. pers. admits a variant *a-ru-ṇa-s*, with familiar ending *s*.

him̥s (with nasal sign in the oi. root)

We explain the imperfect 2. pers. sg. by

* *a-hi-na-s-s*

→ *a-hi-na-s* (simplification of consonant cluster)

The same form should be produced in the 3. pers.. However, this is not what we see. In line with other verbs like *bhi-d* we have endings *s* or *t* in the 2. pers. and ending *t* in the 3.
