Observations & Lessons learnt

- Participants were enthusiastic about knowledge on the bio-business creation acquired during the workshop.
- Realization of the potential of bio-resources for income generation.
- Bio-based business ideas for translation into commercial products and services were designed.

Observations & Lessons learnt

- Leveraging multinational collaborations between different partners viz LU, Mak, IRGIB to enhance learning & knowledge sharing on creation of bio-based businesses.
- Incorporation of bio-entrepreneurship courses in the department of Plant Sciences, Microbiology & Biotechnology, Makerere University in curriculum.

Challenges in implementation of ABSbio project at MaK

Covid-19 pandemic disrupted many activities esp.

- Couching of students by business mentors
- Summer school in Uganda
- Students business ideas lacked start up funding as the activity was not budgeted for

Way Forward

- Follow up project with cross-university knowledge/training to incorporate many beneficiaries in the bio-based business creation.
- Funding for graduates to incubate their business ideas with the industry through business coaching and mentorship.
- Set up an incubation centre in the department for the College of Natural Sciences at MaK for value addition.
- Develop short courses on bio-entrepreneurship

Way Forward

- Encourage students to pool personal resources for project development
